Fund Information as at 30 June 2023

## WHAT IS THE FUND'S OBJECTIVE?

Global Opportunities Equity seeks to give investors access to some of the best fund managers across the globe. Our intent is to outperform its benchmark over any five year period.

## WHAT DOES THE FUND INVEST IN?

Global Opportunities Equity is a multi-manager fund which invests in a limited number of strategies (funds and segregated mandates) managed by top-quality managers that mainly have exposure to shares in developed markets. It is also mandated to include some exposure to emerging markets.

Typically, six to ten strategies are included. Each strategy is selected based on its long-term track record of outperforming the market, its investment philosophy and the quality of its fund managers.

The fund is mandated to use derivative instruments for efficient portfolio management purposes.

## IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

## Risk Profile

8/10 Aggressive Maximum growth/ minimum income exposures

■ Growth Assets: 100%
■ Income Assets: 0%

Global Opportunities Equity invests in equity funds that mostly cover developed markets, including the US, Europe and Japan.

The fund is well-diversified; it has exposure to a range of different countries, industries and fund manager styles. The fund managers included in the fund are well-established and have been rigorously researched and vetted.

While we have a disciplined approach to carefully balance the risks across the different funds, shares can be volatile investments and there is a meaningful risk of capital loss over the short term. Global currency movements may intensify investment gains or declines.

This feeder fund aims to remain fully invested in units in the offshore domiciled Global Opportunities Equity Fund. The only other assets that will be held at feeder fund level are local and foreign cash holdings for liquidity purposes.

## HOW LONG SHOULD INVESTORS REMAIN INVESTED?

The fund is managed to deliver the best possible returns over the long term; an investment horizon of ten years or more is therefore ideal. It is not suitable as a single investment for investors who need to preserve their capital over five years or less.

## WHO SHOULD CONSIDER INVESTING IN THE FUND?

Investors who are building wealth, and who

- want exposure to some of the world's top equity funds as part of a diversified investment portfolio;
- accept that the fund may underperform the market significantly in the short term in pursuit of superior long-term gains;
- are overexposed to South Africa and require an international investment;
- > do not require an income from their investment.

## WHAT COSTS CAN I EXPECT TO PAY?

An annual fee of a minimum of 0.45% is payable.

The component of the fund fee charged at feeder fund level is subject to VAT. Fund expenses that are incurred in the fund include annual fees paid to unconnected underlying fund managers, administrative, trading, custody and audit charges. All performance information is disclosed after deducting all fees and other portfolio costs.

We do not charge any fees to access or withdraw from the fund.

More detail is available on www.coronation.com.

Quarterly Portfolio Manager Commentary

Our full range of rand-denominated offshore funds is temporarily closed to new investments via the South African Unit Trust product. Read more here.

Please note that the commentary is for the US dollar retail class of the Fund. The feeder Fund is 100% invested in the underlying US dollar Fund. However, given small valuation, trading and translation differences for the two Funds, investors should expect differences in returns in the short term. Over the long term, we aim to achieve the same outcome in US dollar terms for both Funds.

#### **Performance**

The Fund advanced 4.4% for the quarter (Q2-23) against a benchmark return of 6.2%, bringing the rolling 12-month performance to 17.7% against the 16.5% returned by the MSCI All Country World Index (ACWI).

Global equity markets had another strong quarter, resulting in an ACWI return of 14% year to date (YTD). Much of this was driven by an artificial intelligence themed rebound among the large growth (mega-cap technology) stocks, which fell sharply in 2022. It would also have been influenced by the US Federal Reserve Board's (the Fed) pause in raising interest rates after the US regional banking crisis in the prior quarter.

North America was the best performing region in Q2-23, advancing 8.5% (in US dollar terms). The weakest return was from the Pacific ex-Japan, which declined 1.8% (in US dollar terms). Japan advanced 6.5% and Europe rose 3.1% (both in US dollar terms). Developed markets (rising 7.0%) outperformed emerging markets (-0.1%) in US dollar terms.

Amongst the global sectors, IT (14.5%), telecommunications (9.3%) and consumer discretionary (10.1%) were the best-performing sectors for the quarter. The worst performing sectors were utilities (-1.5%), materials (-0.8%) and energy (-1.3%).

Performance among the underlying funds was mixed over the period. Tremblant and Egerton finished better than the ACWI, but Contrarius, Eminence, Coronation, and Select Equity all underperformed.

Tremblant enjoyed a very good quarter, delivering 9.9% and was comfortably ahead of the ACWI. Their alpha YTD is now 11.3%. Returns were driven by their exposure to some of the mega-cap technology stocks, such as Meta (+35.4%), Uber Technologies (+36.2%), Amazon (+26.2%), Spotify (+20.2%), and Palo Alto Networks (+27.9%). There were very few losers over the quarter, but Keurig Dr Pepper (-10.8%), SBA Communications (-10.9%), and Five Below (-4.6%) detracted from performance.

Egerton rose 7.7%. Their fund also had exposure to the growth stocks, including Meta and Microsoft (+18.4%), but the overall return was from a diverse range of stocks. Examples include banks such First Citizens (+32.0%) and HSBC (+17.9%), industrials such as Ryanair (+16.2%), Airbus (+9.4%) and Applied Materials (+18.0%), as well as materials in the form of Teck Resources (+15.6%).

Among the underperforming funds, the biggest detractor was Coronation Global Emerging Markets Fund. The fund marginally underperformed its direct emerging markets index, but with emerging markets underperforming developed markets by a large margin this quarter, it was some way behind the ACWI. The fund had many gainers and losers over the quarter, but JD.com (-21.8%), as a significant holding, was a decisive factor in the underperformance against the MSCI Emerging Markets Index over the period.

Contrarius Global Equity delivered 3.6%, after being held back by communications stocks such as Paramount (-28.5%), Warner Brothers (-17.0%), Sinclair (-18.2%), and Caesars Entertainment (-16.0%). Exposure to Tesla (+28.4%), Uber Technologies (+36.2%), and Doordash (+20.2%) were not enough to offset the impact of the losers.

After a strong performance run over the last few years, Eminence Capital, with a return of 3.6%, lagged the ACWI this quarter. Despite exposure to Amazon (+26.2%), Uber Technologies (+36.2%) and JFrog (+40.6%), the impact of the healthcare and materials holdings meant it underperformed this quarter. Examples of these include Tandem Diabetes (-39.6%), Ashland (-15.0%), Envista Holdings (-17.2%), and Bio-Rad Labs (-15.9%).

#### Outlook

The US and other major economies are slowing and remain at risk of further tightening by central banks as they try to bring inflation back to their target levels. Indeed, at the time of writing in early July the Fed minutes showed that further rate hikes in the US were likely in order to cool inflation, despite their pause after the short banking crisis in the first quarter. Notwithstanding the resilience of the global economy during this rate-hiking period, further hikes will only increase the risk of a recession in many countries. Equity markets do not appear to be pricing in any significant period of weakness, although there are clear valuation differences across sectors. With the period of "easy money" coming to an end, our valuation-driven managers should be able to capitalise on a period where astute stock picking will be critical.

Important Information

#### IMPORTANT INFORMATION THAT SHOULD BE CONSIDERED BEFORE INVESTING IN THE CORONATION GLOBAL OPPORTUNITIES [ZAR] FEEDER FUND

The Global Opportunities Equity [ZAR] Feeder Fund should be considered a long-term investment. The value of units may go down as well as up, and therefore Coronation does not make any guarantees with respect to the protection of capital or returns. Past performance is not necessarily an indication of future performance. The fund is mandated to invest up to 100% of its portfolio into foreign securities and may as a result be exposed to macroeconomic, settlement, political, tax, reporting or illiquidity risk factors that may be different to similar investments in the South African markets. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. The top 10 holdings are reflected on a look-through basis. A feeder fund invests in a single fund of a collective investment scheme, which levies its own charges and could result in a higher fee structure for the feeder fund. Coronation Management Company (RF) (Pty) Ltd is a Collective Investment Schemes Manager approved by the Financial Sector Conduct Authority in terms of the Collective Investment Schemes Control Act. Portfolio managed by Coronation Investment Management International (Pty) Ltd (FSP45646), an authorised financial services provider. The Management Company reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate. Unit trusts are allowed to engage in scrip lending and borrowing. Standard Chartered has been appointed as trustees for the fund (www.sc.com/za; 011-2176600). Coronation is a full member of the Association for Savings & Investment SA (ASISA).

#### HOW ARE UNITS PRICED AND AT WHICH PRICE WILL MY TRANSACTION BE EXECUTED?

Unit trusts are traded at ruling prices set on every trading day. Fund valuations take place at approximately 15h00 each business day, except at month end when the valuation is performed at approximately 17h00 (JSE market close) and forward pricing is used. Instructions must reach the Management Company before 14h00 (12h00 for the Money Market Fund) to ensure same day value. The payment of withdrawals may be delayed in extraordinary circumstances, when the manager with the consent of the fund trustees deem this to be in the interest of all fund investors. These circumstances may include periods when significant underlying markets suspend trading which will prevent accurate valuation of the instruments held in the fund. When the suspension of trading relates to only certain assets held by the fund, these assets may be side-pocketed. This process allows normal liquidity on the assets that can be valued, but will delay liquidity on the affected portion of the fund. If the fund is faced with excessive withdrawals, the affected withdrawals may be ringfenced, which is the separation and delayed sale of the assets reflecting the interest of the liquidity seeking investors. It ensures that the sale of a large number of units will not force Coronation to sell the underlying investments in a manner that may have a negative impact on remaining investors of the fund.

#### HOW WAS THE PERFORMANCE INFORMATION INCLUDED IN THIS FACT SHEET CALCULATED?

Performance is calculated by Coronation as at the last day of the month for a lump sum investment using Class P NAV prices with income distributions reinvested. Class A NAV prices were used for the period prior to the launch of Class P. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

## WHAT IS THE TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS (TC)?

TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio over the period referenced. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the underlying fund are excluded. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. The 1 year TER is for the 12 months to end of the previous financial year (updated annually). The 3 year TER is for a rolling 36-month period to the last available quarter end (December, March, June and September).

Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The Total Investment Charge is the sum of the Total Expense Ratio (TER) and transaction costs.

## ADVICE AND PLATFORM COSTS

Coronation does not provide financial advice. If you appoint an adviser, advice fees are contracted directly between you and the adviser. For more information please contact the relevant platform (Linked Investment Service Provider or Life Assurance Provider).

## WHERE CAN I FIND ADDITIONAL INFORMATION?

Additional information such as daily fund prices, brochures, application forms and a schedule of fund fees and charges is available on our website, www.coronation.com
