

# Global Multi-Asset Income Fund

'I' shares, USD As at end June 2023

## Objectives and investment policy summary

The Fund aims to provide income with the opportunity capital growth (i.e. to grow the value of your investment) over the long-term.

The Fund seeks to limit volatility (the pace or amount of change in its value) to be lower than 50% of the volatility of global equities. While the Fund aims to limit its volatility to be lower than 50% of global equities there is no guarantee that this will be achieved over the long-term, or over any period of time.

The Fund is actively managed and invests in a broad range of assets around the world.

The Fund promotes environmental and social characteristics in line with Article 8 of the EU Sustainable Finance Disclosure Regulation (SFDR). The Fund will not invest in certain sectors or investments. Over time, the Investment Manager may, in accordance with the Fund's investment policy, apply additional exclusions to be disclosed on the website, as they are implemented.

Past performance should not be taken as a guide to the future and there is no guarantee that this investment will make profits; losses may be made. If the currency of this share class differs from your domestic currency, your returns may increase or decrease as a result of currency fluctuations.

## Monthly and annual average performance (%)

	1 month	1 year	3 years annualised	5 years annualised	Since launch annualised
Fund - I Inc-2 USD	0.3	4.5	1.7	2.4	3.3

## Calendar year performance (%)

	YTD	2022	2021	2020	2019	2018
Fund - I Inc-2 USD	2.7	-4.8	1.3	5.7	6.9	1.2

## Rolling 12 month performance (%)

	30.06.22 -30.06.23	30.06.21 -30.06.22	30.06.20 -30.06.21	30.06.19 -30.06.20	30.06.18 -30.06.19

## Performance (%)

## Risk statistics

	3 years	5 years
Annualised sharpe ratio (%)	0.1	0.2
Annualised volatility (%)	4.9	5.2

Performance data source: © Morningstar, dates to 30.06.23, NAV based, (net of fees, excluding initial charges), total return, in US dollars. The Fund is actively managed, any index shown is for illustrative purposes only. Performance would be lower had initial charges been included as an initial charge of up to 5% may be applied to your investment. This means that for an investment of \$1,000, \$950 would actually be invested in the Fund.

For general information and/or marketing purposes.

Investors must read the Key Information Document (or Key Investor Information Document where relevant) and Prospectus prior to investing.

## Key facts

**Portfolio manager:** John Stopford, Jason Borbora-Sheen  
**Fund size:** USD 1.8bn  
**Fund launch date:** 26.07.11  
**I Inc-2 USD share class launch date:** 28.11.13  
**Domicile:** Luxembourg  
**Sector:** Morningstar USD Cautious Allocation  
**'I' share class dealing currency:** USD  
**Risk indicator (KID SRI):** 2 out of 7  
**SFDR Classification<sup>8</sup>:** Article 8  
**Ninety One ESG Classification<sup>8</sup>:** Enhanced Integration  
 See explanations for SFDR and Ninety One ESG Classification on Page 2.

## 'I' Inc-2 Share class charges

**Maximum initial charge:** 5.00%  
**Ongoing charge:** 0.90%

The Fund may incur further expenses (not included in the above Ongoing charge) as permitted by the Prospectus.

## Other information

**Pricing:** 16:00 New York Time (forward pricing)  
**Minimum investment:**  
 USD1,000,000 / equivalent approved currency lump sum

<sup>§</sup>This Fund is classified under Article 8 of the EU Sustainable Finance Disclosure Regulation. Article 8 applies to products which promote environmental or social characteristics alongside their financial-only investment objectives. For further information, please see [www.ninetyone.com/SFDR-explained](http://www.ninetyone.com/SFDR-explained)

<sup>§§</sup>Funds that combine ESG integration with one or more binding ESG commitment e.g. exclusions, positive tilting. For further information, please see [www.ninetyone.com/ESG-explained](http://www.ninetyone.com/ESG-explained)

The portfolio may change significantly over a short period of time. This is not a buy or sell recommendation for any particular security. Figures may not always sum to 100 due to rounding.

The yield information has been calculated as at 30.06.23. Where FTSE data is shown, source: FTSE International Limited ("FTSE") © FTSE 2023. Please note a disclaimer applies to FTSE data and can be found at [https://research.ftserussell.com/products/downloads/FTSE\\_Wholly\\_Owned\\_Non-Partner.pdf](https://research.ftserussell.com/products/downloads/FTSE_Wholly_Owned_Non-Partner.pdf). Where MSCI data is shown, source: MSCI. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This report is not approved, endorsed, reviewed or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. All other information is from Ninety One at 30.06.23.

### General risks

The value of these investments, and any income generated from them, will be affected by changes in interest rates, general market conditions and other political, social and economic developments, as well as by specific matters relating to the assets in which they invest. Past performance does not predict future returns; losses may be made. Ongoing costs and charges will impact returns. For Inc-2 and Inc-3 shares classes, expenses are charged to the capital account rather than to income, so capital will be reduced. This could constrain future capital and income growth. Income may be taxable. The Fund's objectives will not necessarily be achieved and there is no guarantee that these investments will make profits; losses may be made. Environmental, social or governance related risk events or factors, if they occur, could cause a negative impact on the value of investments. This Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

### Specific fund risks

**Charges from capital:** For Inc-2 and Inc-3 shares classes, expenses are charged to the capital account rather than to income, so capital will be reduced. This could constrain future capital and income growth. Income may be taxable.

**Commodity-related investment:** Commodity prices can be extremely volatile and losses may be made.

**Currency exchange:** Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

**Default:** There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

**Derivatives:** The use of derivatives may increase overall risk by magnifying the effect of both gains and losses leading to large changes in value and potentially large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

**Emerging and Frontier market (inc. China):** These markets carry a higher risk of financial loss than more developed markets as they may have less developed legal, political, economic or other systems.

**Equity investment:** The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.

**Government securities exposure:** The Fund may invest more than 35% of its assets in securities issued or guaranteed by a permitted sovereign entity, as defined in the definitions section of the Fund's prospectus.

**Interest rate:** The value of fixed income investments (e.g. bonds) tends to decrease when interest rates rise.

### Important information

All data as at 30.06.23. The most up to date fund details (e.g. name, overview, key facts etc) are reflected as at the date of publication. Any changes effective after publication will appear in the next update. This is a marketing communication. It is not to be distributed to retail customers who are resident in countries where the Fund is not registered for sale or in any other circumstances where its distribution is not authorised or is unlawful. Please visit [www.ninetyone.com/registrations](http://www.ninetyone.com/registrations) to check registration by country.

For further information on our sustainability-related funds, please visit [www.ninetyone.com](http://www.ninetyone.com)

A rating is not a recommendation to buy, sell or hold a fund.

The Fund is a sub-fund of the Ninety One Global Strategy Fund, which is a UCITS authorised by the CSSF and organised as a Société d'Investissement à Capital Variable under the law of Luxembourg. Ninety One Luxembourg S.A. (registered in Luxembourg No. B 162485 and regulated by the Commission de Surveillance du Secteur Financier) is the Manager of the Fund. This communication is not an invitation to make an investment nor does it constitute an offer for sale. Please refer to the Prospectus of the UCITS and to the Key Information Documents (KID) or Key Investor Information Documents (KIID), where relevant, before making any final investment decisions.

Fund prices and English language copies of the Prospectus, annual and semi-annual Report & Accounts, Articles of Incorporation and where relevant, local language copies of the KID and KIID may be obtained from [www.ninetyone.com](http://www.ninetyone.com). A summary of investor rights can be found in the Prospectus, and details of Ninety One's complaints handling procedures are available in English on [www.ninetyone.com/complaints](http://www.ninetyone.com/complaints). Ninety One Luxembourg reserves the right to discontinue the marketing of its Funds in countries where they are registered.

In Switzerland, this information is available free of charge from the Swiss Representative and Paying Agent, CACEIS Investor Services Bank S.A., Esch-sur-Alzette, Blicherweg 7, CH-8027 Zurich, Switzerland. In Spain, the Ninety One Global Strategy Fund is registered with the Comisión Nacional de Mercados y Valores as a foreign collective investment scheme marketed in Spain, with the number 734.

In the US, this material may be distributed only to a person who is a "distributor," or who is not a "U.S. person," as defined by Regulation S under the U.S. Securities Act of 1933 (as amended). No shares may be offered or sold in the US to any US person. The fund has not been registered under the United States Investment Company Act of 1940, as amended, nor the United States Securities Act of 1933, as amended (1933 Act).

In Australia, this communication is provided for general information only to wholesale clients (as defined in the Corporations Act 2001).

### Glossary summary

**Alpha:** Jensen's alpha is a risk adjusted measure of a fund's performance relative to its performance comparison benchmark.

**Beta:** A measure of the volatility of a fund relative to its performance comparison index, i.e. how sensitive the fund is to movements in the market. A figure greater than 1 indicates that the fund will tend to outperform in a rising market and under perform in a falling one, i.e. is more volatile than the market. The reverse applies to a Beta of less than 1.

**Credit rating:** A score awarded by an independent rating agency to indicate the financial strength of the issuer of a bond, and the potential for a default on interest and principal payments. The top credit rating is 'AAA'. The lowest rating to be considered 'investment grade' is 'BBB'. Below 'BBB', bonds are termed 'sub investment grade' or 'high yield'. Average credit ratings are based on the individual bond ratings issued by the ratings agencies. For each bond, the ratings issued by each agency are combined to form a single rating based on the methodology that most closely matches the performance comparison index (PCI), otherwise median is typically used where there is no PCI. The portfolio rating is the weighted average of the above bond ratings.

#### Distribution types

**Accumulation (Acc):** An accumulation share will not make income payments to shareholders but will instead accrue the income daily in the net asset value of the share class.

**Income (Inc):** An income share will distribute all or part of the income accruing in that share class.

**Income-2 (Inc-2):** These distribute the income accruing in the share class and charge all their expenses to capital. This maximises the income available for distribution – although it also reduces capital by an equivalent extent which could constrain future capital and income growth. This can be inefficient from a tax perspective in those countries where income tax rates are higher than those on capital gains.

**Income-3 (Inc-3):** These share classes are similar to Inc-2 share classes in that they charge all their expenses to capital in order to maximise the amount of distributable income. Additionally, Inc-3 share classes aim to provide a consistent distribution rate which is based on the investment manager's expectation of the long term underlying yield. To achieve this they may make distributions from capital or carry over excess income from one calendar year to the next. As the income rate is based on a forecast, there is a risk that future income generated by the fund is overestimated leading to distributions being taken from capital which could also constrain future capital and income growth.

**Duration:** This is a measure of risk for funds which invest in bonds as it predicts the sensitivity of the value of a fund's portfolio given changes in interest rates. The higher the value the greater the volatility of the fund's performance resulting from changes to interest rates. The Modified duration is shown.

**GSF:** Ninety One Global Strategy Fund.

**Information ratio:** A measure of a portfolio manager's skill against a performance comparison index. The over or underperformance of the fund relative to its performance comparison index is divided by the tracking error. In this way, we arrive at the value, per unit of extra risk assumed, that the manager's decisions have added to what the market would have delivered anyway. The higher the Information Ratio the better.

**KID SRI:** The Summary Risk Indicator (SRI) appears in the Key Information Document (KID) and it is a guide to the level of risk of this product compared to other products. It shows how likely the product will lose money because of movements in the markets. A rating of 1 represents a low level of potential losses from future performance and a rating of 7 represents a high level of potential losses from future performance. UK-domiciled investors should refer to the risk indicator contained in the relevant Key Investor Information Document (KIID).

**Maturity profile:** The average life of each bond in a fund's portfolio, weighted by value.

**Ongoing charge:** This figure includes the annual management fee and administrative costs but excludes any performance fee or portfolio transaction costs (except in the case of an entry or exit charge paid by a fund when buying or selling units in another fund). Ongoing charges may vary from year to year.

**NAV:** The Net Asset Value (NAV) represents the value of the assets of a fund less its liabilities.

**Sector:** A peer group of funds managed to a similar investment policy. Not every fund will have a relevant sector, but for those that do, a full list of the funds included in the sector can be obtained from us on request.

**Tracking error:** A measure of how much a fund's returns deviate from those of its performance comparison index. The lower the number the closer the fund's historic performance has followed that of its performance comparison index.

**Volatility:** The amount by which the performance of a fund fluctuates over a given period.

**YTD:** Year to date.

#### Yields

**Yield:** The Yield reflects the amounts that may be distributed over the next 12 months as a percentage of the Fund's net asset value per share, as at the date shown, based on a snapshot of the portfolio on that day. Where there is a yield number in brackets, it is calculated in the same way, however, as the charges of the share class are deducted from capital rather than income, it shows the level of yield had these charges been deducted from income. Yields do not include any preliminary charge and investors may be subject to tax on their distributions. The effect of taking expenses from capital is to increase income whilst reducing capital to an equivalent extent and may constrain future capital and income growth.
